## Adresse de livraison

N*, rue, voie*	
Complément d'adresse	
Code postal*	
Ville *	

Point	Expected	
1	All information and fields for the account creation. Both FO & BO. Based on the	
	customer models.	
	Use these fields for the billing address.	
2		
	- If ticked; the delivery address = the billing address	
_	- If the customer unticks the box ; unfold " <b>7</b> "	
3 & 4	FO:	
	It is the same text to display, the same box to display.	
	- It is unticked by default	
	- If "3" is ticked; "4" is automatically ticked	
	- If "4" is ticked; "3" is automatically ticked  The form con't be validated if it's unticked, display error massage as planned.	
	- The form can't be validated if it's unticked; display error message as planned	
	BO:	
	This should be a new field added in the customer account in Back-Office.	
	Goal: save a proof of the customer's agreement, following the GRPD.	
	Info to store in DB (should be discussed again on WM side with a lawyer):	
	- Exact Date + hour (DD/MM/YYYY ; HH/MM/SS)	
	- IP	
	- Value ("Yes" / "No")	
	=> Reminder : we should never have a "No" at the end, as the box is	
	mandatory	
5 & 6	CTA to validate the form : same CTA, same wording.	
	- If errors in the fields ; do not validate	
_	- If all fields are validated; go to the next step	
7	Fields to use for the delivery address. Based on the customer model!	
	Ex: a "private" on FR website will have a first option field for the company name.	
	Note:	
	- the design here is not a specification	
	- it must be displayed between "billing address fields" and CTA to validate the	
	step.	
	Note: it will create a second address in the "address management screen". This	
	address will be linked only to the delivery.	
	addition that the desired for
